### Enjoy the longer days - just you, your dog and HiLife!

.... The longer days and the (slightly) warmer weather offer you and your dog lighter evenings and the chance to enjoy a more leisurely evening walk together. It's a great way for you both to wind down and relax at the end of the day, and an opportunity for you to inject some extra fun into the occasion, and keep your dog's gums and teeth clean and healthy at the same time!

Just like us, dogs benefit from good dental care, so a HiLife Rawhide Chew can be a welcome and beneficial companion on your regular stroll. HiLife Bag o' Bones and HiLife Chew Sticks are both complementary pet foods that are highly digestible, promote dental health and keep tartar under control. Your dog will be delighted to be given such a tasty treat and you can be reassured that you're helping your canine companion maintain good dental hygiene.

Bag o' Bones come in a pack of 12, and Chew Sticks in a pack of 100. They provide a handy snack at any time of the day and a fun way for you to treat your dog as you both make the most of the start of summer.

You'll find full details of Bag o' Bones and Chew Sticks on this website.
